NET CONTENTS:
2x10 Litres

Actiwett®

non-ionic adjuvant

HSNO Class: 6.1D, 9.3C

HEALTH WARNING: HARMFUL – may be harmful if swallowed, inhaled or absorbed through the skin.

ENVIRONMENTAL WARNING: HARMFUL to terrestrial vertebrates.

PRODUCT DISPOSAL: Ensure unwanted product is used by another operator strictly in accordance with label directions. Do not allow product to enter waterways, drains or sewers.

CONTAINER DISPOSAL: Ensure container is completely empty. Burn if permitted and circumstances, especially wind direction allow, otherwise bury in landfill.

HANDLING PRECAUTIONS: When mixing or applying, wear protective clothing, gloves and goggles. Do not eat or drink while using. Wash hands and face before meals and after work. Wash protective clothing after work.

STORAGE: Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Storage must be generally in accordance with NZS8409 Management of Agrichemicals. See the HAZNOTE for further information.

FIRST AID: If swallowed do NOT induce vomiting. For advice, contact the National Poisons Centre **0800 POISON (0800 764 766)** or a doctor immediately. If skin, hair or eye contact occurs, remove contaminated clothing and flush skin, hair and/or eyes with running water for several minutes.

PRODUCT INFORMATION

ACTIWETT is a general purpose, non-ionic surfactant designed to improve the coverage of pesticides.

TM- Actiwett is a Trademark of Loveland Products Inc.

ACTIWETT reduces the surface tension of the spray so that the droplets which form when the spray leaves the nozzle are reduced in size. These small droplets, because of the reduced surface tension, spread over the surface of the plant and combine with other droplets to form a continuous film and give uniform coverage.

ACTIWETT aids the coverage and penetration of the sprays into cracks and crevices, through insect and plant hairs and will form an even spray on the target plants.

ACTIWETT also resists light rainfall and reduces the erosion of the chemical from the leaves. If good rain protection is required use **Bond®1** or **BondXtra®1** for dependable adhesion in adverse conditions.

RECOMMENDATIONS

For Horticultural insecticides and fungicides – use 25 mls per 100 litres of water. On hard to wet surfaces e.g. brassicas and onions, increase the rate to 50 – 70 mls/100 litres water.

WARNING: Actiwett may induce increased levels of russet in apples, pears and other russet prone crops.

For herbicides – use 25 ml/100 litres water for most dilute applications. Do not use with selective herbicides unless a non-ionic surfactant is recommended.

COMPATIBILITY

ACTIWETT is compatible with most commonly used insecticides, fungicides, herbicides and foliar fertilisers.

EXCLUSION OF LIABILITY: PLEASE READ

To the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, Elliott Technologies Limited as distributor, nor any other distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever arising in connection with the supply of these goods.
