

SPREAD, STICK and STAY – no matter what the weather

A superspreading rainfast crop adjuvant for use in low volume spraying. BOND Xtra dramatically improves spreading, coverage and retention of sprays to withstand wet conditions, plus reduces application spray drift. BOND Xtra is a unique blend of a crop safe organosilicone, surfactant blend with rainfast adjuvants.

SAVE time and costs with low volume spraying

- Spray more hectares with one tank fill
 - Better manpower, sprayer utilization

Get BETTER performance from crop protection sprays by:

- Superior coverage including hard-to-reach areas
- Better retention of sprays on the crop
- Much reduced washoff from rainfall

MORE product on target at less cost

Features

- Applications are rainfast within minutes
- Spreading 3 to 5 times greater than non-ionic surfactants
- Superior wetting and coverage of difficult targets like grape berries or brassica leaves
- Increased retention of sprays on target crop
- Increased crop canopy penetration and deposition.
- Much reduced off-target drift

BOND Xtra Superspreader provides outstanding rainfastness, coverage and deposition in much less water.

Benefits

Weather-proofing crop protection sprays to resist wash-off.

- Low volume application savings
- Better performance through better coverage
- Does not encapsulate vapour-acting or systemic pesticides

Getting the best out of BOND Xtra

Use calibrated and crop configured sprayers

- Use BOND Xtra when rain is likely within 5 days.
- Use twin cap nozzles when spraying field crops.
- Use the recommended rate chart for BOND Xtra use rates.
- Use water rates guidelines
 - Field Crops 50 - 200 L/ha
 - Vines 200 L/ha
 - Tree Crops (pipfruit/stonefruit) 250 - 350 L/ha

✓ Fungicides ✓ Insecticides ✓ Micro nutrients
Do not use with Herbicides

Spread, Stick and Stay in Arable Crops

Trials conducted in Canterbury have demonstrated that when BOND Xtra is used, spray water rates can be significantly reduced. When added to an Amistar®/Opus® spraying regime on spring barley, BOND Xtra demonstrated that 50 L/ha out performed 200 L/ha!

Disease control was not compromised – the net result being equal to or higher yields with less effort. Trials conducted by Bayer UK showed similar results when BOND Xtra was added to Twist®. BOND Xtra is used extensively in tank mixes in the UK cereal market.

Pack size: BOND Xtra 10 L
