APPROVED HANDLER APPLIES
This product must be under the personal control of an approved handler or secured.

ENVIRONMENTAL WARNING: VERY TOXIC TO AQUATIC ORGANISMS.
Avoid contamination of any water supply with product or empty container. **VERY TOXIC TO THE SOIL ENVIRONMENT** - herbicide.

HEALTH WARNING: HARMFUL – may be harmful if swallowed, inhaled or absorbed through the skin. May cause sensitization from prolonged skin contact. Avoid skin contact and inhalation of spray mist.

PRODUCT DISPOSAL: Ensure unwanted product is used by another operator strictly in accordance with label directions.

CONTAINER DISPOSAL: Triple rinse container and add residue to spray tank. Submit clean empty container for recycling through Agrecovery. If this is not possible, burn if permitted and circumstances, especially wind direction allow, otherwise bury in landfill.

HANDLING PRECAUTIONS: When mixing or applying, wear protective clothing, gloves and goggles. Do not eat or drink while using. Wash hands and face before meals and after work. Wash protective clothing after work. Store in original container away from food and feedstuffs. Flush spray equipment thoroughly after use.

STORAGE: Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Storage must be generally in accordance with NZS 8409 Management of Agrichemicals. See the HAZNOTE for further information.

When stored appropriately this product should show no significant degradation for 2 years from date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

First Aid: If swallowed do NOT induce vomiting. For advice, contact the **National Poisons Centre 0800 POISON (0800 764 766)** or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

EXCLUSION OF LIABILITY: PLEASE READ
To the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, Elliott Technologies Limited as distributor, nor any other distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever arising in connection with the supply of these goods.

See www.nzfsa.govt.nz/acvm/ for registration conditions.

PRODUCT INFORMATION
CHLORONION is a selective pre- and post-emergence herbicide providing a good residual action against a wide range of annual broadleaf weeds and some annual grasses with a contact action on a wide range of weeds up to the 2 leaf stage. Adequate soil moisture is required for good residual activity. The post-emergent effect can be enhanced with the addition of **Peptoil TM1 Crop Oil Concentrate**. Chloronion remains effective in the soil for several weeks.

Susceptible weeds		Moderately Resistant susceptible	
Annual poa	Penny cress	Barnyard grass	Couch
Black nightshade	Rayless chamomile	Cleavers	Thistles
Charlock	Redroot	Curled dock	All weeds past the 2 leaf stage
Chick weed	Speedwells	Fumitory	
Docks	Water purslane	Spurrey	
Fathen	Wild carrot	Summer grass	
Galinsoga	Wild radish		
Groundsel	Willow weed		

DIRECTIONS FOR USE
MIXING: Always shake the container before use. Pour the required amount directly into the partly filled spray tank with agitation running. Complete filling of the spray tank.

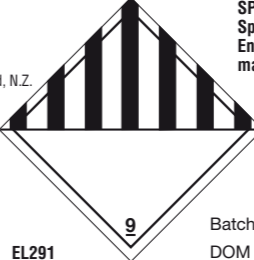

RECOMMENDATIONS: Apply Chloronion in 300-600 litres of water per hectare. Use the higher rate on heavy clay soils or soils rich in organic matter.

FODDER BEET, RED BEET, SILVER BEET, MANGOLDS:
PRE-EMERGENCE: Apply 7 to 10.5 litres per hectare as soon as possible after seeding and before crop emergence, to a fine, moist soil surface. If weeds are present, mix with a suitable contact herbicide. If soil is dry, rain or irrigation is required within 6 to 7 days for residual activity.

POST-EMERGENCE: Apply 7 - 9 litres per hectare to a weed free soil after the first true leaf is visible on the beet. Do not spray in the 8 days before thinning. The addition of **Peptoil Crop Oil Concentrate** at 1 litre per hectare will enhance the knockdown on weed up to 2 true leaf.

ONIONS AND CHIVES:
POST-EMERGENCE: Apply 1 to 2 litres Chloronion with 1 to 2 litres of Chloro-IPC (400 g/litre formulation) and 1 litre **Peptoil Crop Oil Concentrate** per hectare at the flag stage. Apply the Chloronion and the Chloro-IPC at equal rates for best results. Repeat the application 2 to 3 weeks later. Weeds should not have passed the 4 true leaf stage. For best contactaction, no rain should fall for 6 hours after application. Rain is required, however, within 7 days for good residual activity.

CAUTION: Crop damage may occur on light soils.
SPRAY DRIFT: Beware - apply this product carefully. Spray drift may cause serious damage to desirable plants. Ensure compliance with any relevant regional air management plans
