

Du-Wett[®]

RAIN MASTER

Super Spread, Stick and Stay
no matter what the weather!

Du-Wett Rainmaster dramatically improves spreading, coverage and retention of sprays to withstand wet conditions and reduce spray drift.

For use in low to medium volume spraying.

SAVE Time and Costs with Low Volume Spraying

- Spray more hectares with one tank fill
 - Better manpower, sprayer utilization and less fuel

Get BETTER performance from crop protection sprays by:

- Superior coverage including hard-to-reach areas
- Better deposition of sprays on the crop
- Better retention during rain and irrigation

Benefits:

- Weather-proofing crop protection sprays to resist wash-off.
- Low volume application savings
- Better performance through better coverage & deposition
- Does not encapsulate vapour-acting or systemic pesticides

Getting the best out of **DuWett**[®] RAINMASTER

Super Spreader Sticker

Use calibrated and crop configured sprayers...

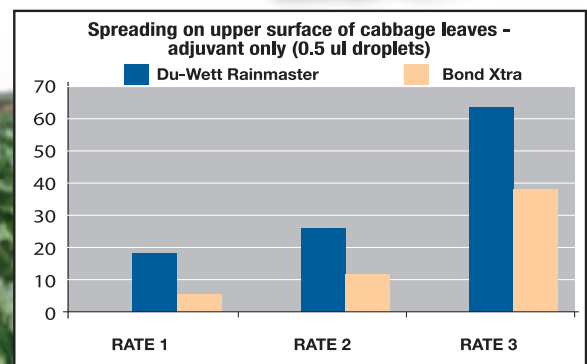

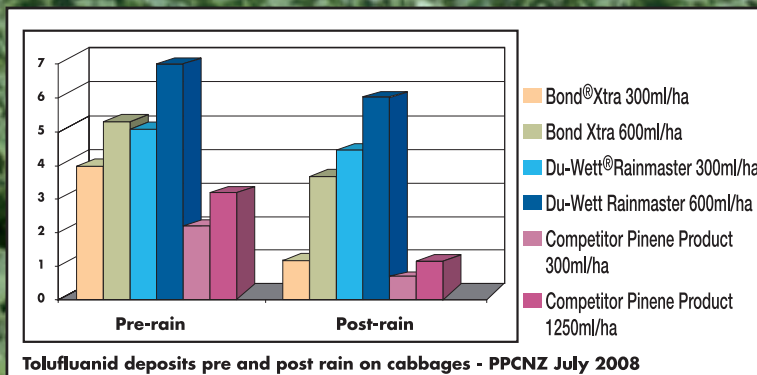

- Use Du-Wett Rainmaster when rain is likely within 5 days.
- Use twin cap nozzles when spraying field crops.
- Use the recommended rate chart for Du-Wett Rainmaster use rates (normally double Du-Wett rates).
- Use water rate guidelines
 - Field Crops 50 - 200 L/ha
 - Vegetables 100 - 300 L/ha
 - Vines 200 - 400 L/ha
 - Avocado, Kiwifruit, Citrus (see crop specific technotes)

Features:

- Applications are rainfast within minutes
- Spreading over 2 X greater than Bond Xtra and up to 10 X greater spread than competitor Pinene product
- Superior wetting and coverage of difficult targets like grape berries or brassica leaves
- Increased retention of sprays on target crop
- Increased crop canopy penetration and deposition
- Much reduced off-target drift

✓ **Fungicides** ✓ **Insecticides** ✓ **Micro nutrients**

Do Not use with Herbicides
