

**WARNING-FLAMMABLE LIQUID  
KEEP OUT OF REACH OF CHILDREN**

# ELLIOTRIL™

**Contact herbicide for the control of  
broadleaved weeds in garlic and onions**

**Read the Label Carefully before use**

**Active Ingredient:**  
240 g/litre ioxynil as the octanoate ester  
in the form of an emulsifiable concentrate.  
Also contains 626 g/litre xylene.

**HERBICIDE**

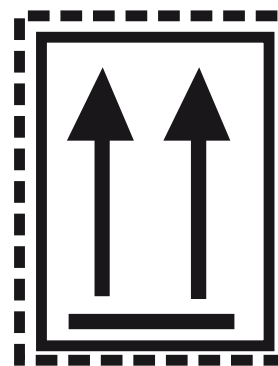

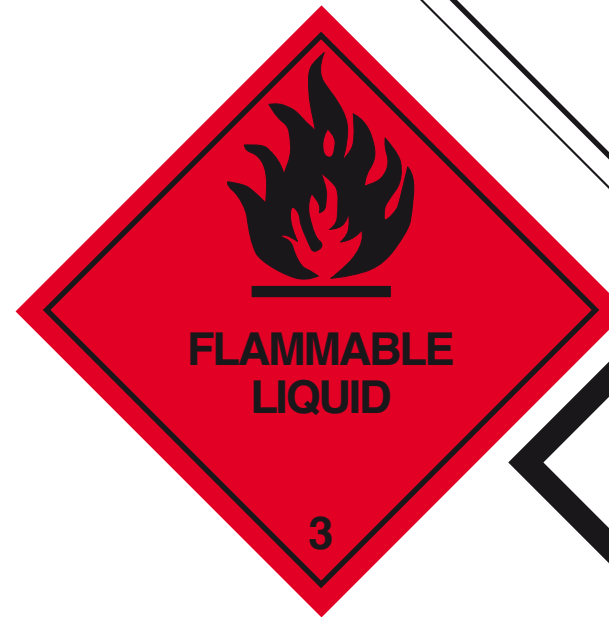

**NET CONTENTS:  
10 Litres**

**WARNING – FLAMMABLE LIQUID - ECOTOXIC**  
**HSNO Class:**  
**3.1C, 6.1C, 6.3A, 6.4A, 6.5B, 6.8B, 6.9B, 9.1A, 9.3C**  
**Approved Handler and Tracking apply**  
This product must be under the personal control of an approved handler or secured.  
Location and movement of this product must be recorded at each stage of its life cycle.  
**ENVIRONMENTAL WARNING: VERY TOXIC TO AQUATIC ORGANISMS.** Do not apply to bodies of water. DO NOT contaminate sewers, drains, dams, creeks or any other waterways with product or empty container. **HARMFUL TO TERRESTIAL VERTEBRATES.** Very toxic to some plant species – selective herbicide.  
**HEALTH WARNING: TOXIC** – May be fatal if swallowed, inhaled or absorbed through the skin. **HARMFUL** – May cause skin and eye irritation. Avoid contact with skin and eyes. May cause sensitisation from prolonged skin contact. Repeated exposure at high doses may cause reproductive damage and may cause organ damage.  
**PRODUCT DISPOSAL:** Ensure unwanted product is used by another operator strictly in accordance with label directions.  
**CONTAINER DISPOSAL:** Triple rinse container and add residue to spray tank. Submit clean empty container for recycling through Agrecovery. If this is not possible, burn if permitted and circumstances, especially wind direction permit, otherwise bury in landfill.  
**CLEANING:** Flush spray equipment thoroughly with clean water after use.  
**HANDLING PRECAUTIONS:** When mixing or applying, wear protective clothing, gloves and goggles. Do not eat drink or smoke while using. Wash hands and face before meals and after work. Wash protective clothing after work. Clean spray equipment thoroughly after use with clean water.  
**STORAGE:** Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Do not store near sources of ignition. This product is classified under HSNO as 9.1A, and storage of certain quantities may require bunding and signage. See the HAZNOTE for further information.  
When stored appropriately this product should show no significant degradation for 2 years from date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

**FIRST AID:** If swallowed do NOT induce vomiting. For advice, contact the **National Poisons Centre 0800 POISON (0800 764 766)** or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

DOM:

**PRODUCT INFORMATION**  
**ELLIOTRIL** is a quick-acting contact herbicide with very limited translocation and no useful soil activity. Good coverage of the target weed is therefore essential. **ELLIOTRIL** is active on a wide range of broadleaved weeds. Weeds should be small and actively growing. Best results are obtained using low rates at frequent intervals. **ELLIOTRIL** can be tank-mixed with a wide range of herbicides registered for use in onions and garlic, to improve the spectrum of activity.

**WEEDS CONTROLLED AS SEEDLINGS:**

RATE : 1.8 LITRES/HA		2.7 LITRES/HA	
Annual sowthistle	Cleavers	Field pansy	Fumitory
Black Nightshade	Cornbind	Nettle	Buttercup
Chickweed	Dandelion	Speedwells	Deadnettle
Fathen	Musky Storksbill	Stinking Mayweed	Plantain
Shepherds purse	Twin cress	Groundsel	Wild turnip
Willowweed			

**DIRECTIONS FOR USE**  
**APPLICATION** - Apply through conventional ground equipment ensuring good coverage of the weeds.

**RECOMMENDATIONS**  
**ONIONS AND GARLIC:** Apply 1.8 - 2.7 litres/ha in a minimum of 450 litres of water/ha when weeds are small and onions have 3 true leaves. Re-apply as required.

Split applications at rates of 450 ml/ha at 7 day intervals in combination with other herbicides registered for onions can improve the spectrum of activity and allow applications at the 2 true leaf stage of the onion.

- NOTES:**
- Slight scorch or wilting can occur after application but this is only temporary. Hot dry conditions can enhance this effect.
  - Test tank mixtures on small areas before treating large fields.
  - Do not add any adjuvants, such as surfactants, to **ELLIOTRIL** alone or **ELLIOTRIL** tank mixtures unless previous experience has shown them to be safe.
  - Although **ELLIOTRIL** becomes rainfast only after 3 hours, good results are obtained in warm misty conditions. Warm temperatures, high humidity and low light enhance **ELLIOTRIL'S** activity.

**BEWARE: Apply this product carefully. Spray drift may cause serious damage to other desirable plants. READ THE LABEL CAREFULLY BEFORE USE.**

**EXCLUSION OF LIABILITY: PLEASE READ**  
To the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, Elliott Technologies Limited as distributor, nor any other distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever arising in connection with the supply of these goods.
