**HSNO CLASSES 6.5B, 6.9B, 9.1A**

**WARNING**

Toxic if ingested. Keep out of the reach of children. May cause liver damage if ingested at high dose rates for a prolonged period of time.

May cause severe eye irritation. Wear eye protection when mixing or applying.

Toxic to Fish. Avoid contamination of any water supply with chemical or empty container.

**PRECAUTIONS:**

Keep out of reach of children. Avoid skin contact and inhalation of spray mist or powder. Wash hands and exposed skin before meals and after work. Dispose of empty container safely. Keep away from fire or sparks.

**DISPOSAL:**

Ensure container is completely empty by emptying into application equipment or other use. Burn empty container in an appropriate incinerator if permitted and circumstances, such as wind direction permit. Otherwise bury in a suitable landfill. Dispose of unused product only by using in accordance with label directions or at an approved landfill.

**SPILLAGE:**

Sweep up spilled pellets and dispose of safely. (Use according to label or in an approved landfill).

**STORAGE**

Store in original container in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Storage must be in accordance with the current version of NZS8409 Management of Agrichemicals. See the PRODUCT SAFETY CARD for further information. When stored appropriately this product should show no significant degradation for 2 years from date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

**GENERAL INFORMATION**

Nautile is a mixture of a protectant fungicide – mancozeb and the systemic fungicide - cymoxanil.

Mancozeb provides protectant activity against disease. Cymoxanil is a contact and systemic fungicide that exerts curative activity on downy mildew and late blight when applied immediately after spore germination.

**DIRECTIONS**

CROP	DISEASE	REMARKS
Onions Garlic	Downy Mildew	Apply 2.2 – 3.3 kg/ha. Use in a programme with suitable alternative fungicides. Begin spraying at the 2 true leaf stage and continue on a 7 to 10 day schedule, using Nautile during periods of high disease pressure. Do not use more than three times in succession and do not apply more than 5 times per season.
Potatoes	Late Blight Early Blight	Apply 2.0 – 2.3 kg/ha at 7 – 10 day intervals. Use during periods when disease pressure is high and use alternative fungicides at other times. Do not use more than three times in succession and do not apply more than 5 times per season. Use the higher rate under extreme infection conditions (Warm with high humidity).

**COMPATIBILITY**

Nautile is compatible with most insecticides. Not compatible with Bordeaux mixture or lime-sulphur or other alkaline products.

**RESISTANCE MANAGEMENT**

Potatoes and Onions and Garlic, Late Blight and Downey mildew Do not use more than three times in succession and do not apply more than 5 times per season.

**WITHHOLDING PERIODS**

Onions, Garlic and Potatoes: 14 Days
